# Establishing a Web-Based Data Collection System for National School Lunch and National School Breakfast Program Data

## Technical Report

By Loren Bell, Health Systems Research, Inc., and Anne Kenyon, Todd Heinrich, and Dea Zullo, RTI

ERS project representatives: Parke Wilde and Alex Majchrowicz

### Abstract

This report is a followup to an initiative to establish a central website to collect data from States on the National School Lunch and the School Breakfast Programs. A central website could be used by researchers and program administrators to compare and analyze data across State and local areas for participation trends in local school district programs. The report provides an implementation plan for establishing a central website, including potential costs, benefits, and alternatives. The initiative is one of three that have the potential to improve the usefulness and cost-effectiveness of research on Federal food assistance and nutrition programs. The other initiatives are addressed in the reports, *Linking the Current Population Survey to State Food Stamp Program Administrative Data* (E-FAN-04-005-1) and *Linking WIC Program Data to Medicaid and Vital Records Data* (E-FAN-04-005-2).

**This report was prepared by Health Systems Research, Inc., and RTI under a research contract from the Economic Research Service. The views expressed are those of the authors and not necessarily those of ERS or USDA.**
